

# FRACTRACKER ALLIANCE

## INSIGHTS EMPOWERING ACTION

## WHAT WE DO

**FracTracker Alliance studies, maps, and communicates the risks of oil and gas development to protect our planet and support the renewable energy transformation.**

### DATA-DRIVEN RESOURCE

We collect data and then analyze, interpret, and map the results. We offer maps of every US state with active drilling and have created hundreds of thematic maps and analyses.

### SUPPORT FOR RESEARCH AND ADVOCACY

We offer mapping and analytical services to nonprofit and academic partners working on all types of energy issues across the country and around the world.

### COMMUNITY-BASED RESEARCH

We provide more than technical expertise and online resources. We also work in communities, collaborating with local stakeholders to document and learn more about the harms of extraction.

## HOW YOU CAN HELP

There are many ways you can get involved.

We've created a mobile app (photo right) that you can use to take pictures and submit reports about oil and gas activities. Download the app: [fractracker.org/apps](http://fractracker.org/apps)

You can also share your photos with us directly via email to help document oil and gas extraction and issues.

Learn more about the concerns by taking a field tour of oil and gas development near you. More info: [fractracker.org/get-involved](http://fractracker.org/get-involved)

## SUPPORT US

FracTracker has served as a data resource for Dakota Access Pipeline protesters, moms fighting fracking near schools in Pennsylvania, and researchers identifying health risks from compressor stations. And these are just a few examples of how our work has impacted people's lives.

Like our work? Invest in FracTracker Alliance and empower the public with our growing portfolio of maps, insights, and information. Help us continue to be a resource for good. FracTracker is a registered 501(c)3 organization. Your contribution is tax deductible.

**Support us, so we can continue to support others.
